# Gautam Mittal

gautammittal.com | gbm@berkeley.edu | +1 (480) 648-8254

# **EDUCATION**

## **UC BERKELEY**

B.S. Electrical Engineering & Computer Science (EECS)

Expected May 2022 | Berkeley, CA

Regents' and Chancellor's Scholar Accel Scholar Eta Kappa Nu (EECS Honor Society)

Cal Hacks, UC Jazz, Statistics
Undergraduate Student Association

# SKILLS

#### **LANGUAGES**

Python • JavaScript • Swift • Java • C Scheme • Ruby • Objective-C • SQL

#### **TOOLS**

React • GraphQL • Node.js • Flask
Rails • Keras • TensorFlow • Jupyter
NumPy • Flow • HTML • CSS
Processing • Chrome Headless • AWS
GCP • UNIX • Git

# LINKS

GitHub: github.com/gmittal

LinkedIn: linkedin.com/in/mittalgautam

Website: gautammittal.com

# **COURSEWORK**

#### **UNDERGRADUATE**

CS61A: Structure & Interpretation of

Computer Programs

CS61B: Data Structures & Algorithms

CS61C: Machine Structures CS70: Discrete Mathematics &

**Probability Theory** 

CS170: Efficient Algorithms &

Intractable Problems

CS188: Artificial Intelligence

CS198-082: Machine Learning DeCal

EE16A: Linear Algebra, Circuits, &

Systems I

EE16B: Differential Equations, Devices,

& Systems II

EECS126: Probability & Random

Processes

MATH53: Multivariable Calculus PHYSICS7B: Thermodynamics,

Electricity, Magnetism

## **EXPERIENCE**

# RISELAB, UC BERKELEY | Undergraduate Researcher

September 2019 - Present | Berkeley, CA

- Working on applications of deep reinforcement learning for database systems with Zongheng Yang under Professor Ion Stoica.
- Presented modular research platform for designing learned database query optimizers with deep RL at RISE Retreat (January 2020).

## **STRIPE** | Software Engineering Intern

May 2019 - August 2019 | San Francisco, CA

- Built an end-to-end data export pipeline for Connect, used daily by Lyft, DoorDash, and others to process millions of financial objects.
- Refactored export infrastructure to use a concurrent GraphQL resolver to enable API-consistent data, faster exports, and increased security.
- Designed and tested data infrastructure using Ruby, ElasticSearch, & MongoDB; worked on Dashboard front-end with React.
- Coordinated UX research study to understand user needs and adjusted engineering & product roadmap accordingly.

## **EDMODO** | Machine Learning Intern

June 2017 - August 2017 | San Mateo, CA

- Designed deep learning models with Python, TensorFlow, NLTK, and Pandas to recommend user-generated questions for content engine with 100M+ users.
- Implemented a training & evaluation pipeline and wrote scripts to preprocess and classify noisy signals from ElasticSearch index of world's largest educational social network.
- Designed experiments with seq2seq translation models, ByteNet, and denoising networks for text normalization; reported directly to CTO for Al.

# **PROJECTS**

#### **COPILOT** | Executive Director

June 2016 - June 2018 | JavaScript, Node.js, Firebase

 Designed and implemented an online, anonymous peer-to-peer mental health counseling platform; Source code: github.com/projectcopilot

#### **JAZZML** | Real-time Computer Jazz Improvisation

August 2016 | Python, TensorFlow, FluidSynth

 Signal processing (FFT) and recurrent neural network (RNN) to generate improvised jazz solos with live accompanist; Source code: github.com/gmittal/jazzml

# **AWARDS**

- 2019 IEEE Eta Kappa Nu Member (top 25% of Berkeley EECS)
- 2019 Accel Scholar (run by Accel Partners & Berkeley EECS)
- 2019 Kleiner Perkins Engineering Fellow
- 2018 UC Berkeley Regents' and Chancellor's Scholarship
- 2018 US Marine Corps & Louis Armstrong Jazz Awards
- 2016 2016 MIT Zero Robotics Challenge ISS Finalist
- 2015 Top 10 & Best Cloud App at PennApps XII Hackathon
- 2015 Apple WWDC Scholarship
- 2015 Top 10 at MHacks V Hackathon
